## BULK BREW

Perfectly suitable for sites where, at peak moments large quantities of coffee are needed. This series is equipped with or without a separate tap for hot water.

These machines have to be connected to the water mains and will brew large quantities of coffee into containers at any time. The containers can then be moved to serve coffee locally.

- Round filtering machines with connection for mains water supply
- 1 or 2 container systems available
- Integrated hot water section available
- 10 minutes brew time
- Approximately 480 cups per hour
- Fitted with coffee-ready signal, total & daily counters, built-in clock and descaling indicator
- Optimum safety mechanisms
- Removable containers
- Requires 30amp single phase supply

Models available: B5, B10, B20, B5 HW, B10 HW

| HWA 20      | 205        | 430         | 355        | 13amp |
| HWA 50 415V | 295        | 582         | 525        | 30amp |

## WATER CHILLER

Delicious cold, pure and crystal clear water. The benefit of direct connection to the mains water supply eliminates the need for manoeuvring heavy water bottles. Besides space saving it is also cost effective thanks to the connection to the mains water supply. The water cooler comes equipped with the unique Bravilor Bonamat membrane filter so any micro organisms do not stand a chance of getting through the filtration system.

- Holding capacity: 2 litres
- Throughput per hour: approx. 5 litres
- Low maintenance and easy to operate

| Dimensions | Width (mm) | Height (mm) | Depth (mm) | Power |
|------------|------------|-------------|------------|-------|
| Chiller    | 245        | 572         | 507        | 13amp |
